SD11 Q4 Extra assignment

Version: September 2019

## Table of Contents

Assignment: Word counter

Write a C++ program which takes the sentence and counts the words in it:

```
C:\Users\        .source\repos\Project1\Debug\Project1.exe                    —    □    X
Welcome to a word counter

Please insert a sentence
this is an extra assignment this assignment will give you 2 bonus points

In the sentence provided, there were following unique words:
Word            this            used: 2 time(s)
Word            is              used: 1 time(s)
Word            an              used: 1 time(s)
Word            extra           used: 1 time(s)
Word            assignment          used: 2 time(s)
Word            will            used: 1 time(s)
Word            give            used: 1 time(s)
Word            you             used: 1 time(s)
Word            2               used: 1 time(s)
Word            bonus           used: 1 time(s)
Word            points          used: 1 time(s)
Press any key to continue . . .
```

Words in the list appear once, but the program has counted the multiplicity of them in the sentence.

Your sentence does not have to include capital letters and can ignore the dots and commas (words with capital letters and words with small letters don't have to be distinguished, etc)
